Built-in Stainless Weighing Platform

description	ROBUST AND PRACTICAL WEIGHING PLATFORM, FOR RECESSED MOUNTING IN A PIT, INDICATED FOR ALL TYPES OF INDUSTRIAL AND COMMERCIAL APPLICATIONS.			
highlights	The structure designed for maximum strength allows the equipment to support a high frequency of use • Removable tray allows recessed mounting in pit, ideal for weighing in confined spaces • Load cells with adjustable feet and built-in bubble level allow correct leveling of the equipment • Complies with directive 2014/31/eu for commercial transactions.			
platform	Made of stainless steel • removable tray • Equipped with 4 load cells • Built-in bubble level.			
load cells	Cut-type analog load cells • Capacities of 500 / 750 / 1000 / 1500 kg • The stainless steel • Adjustable rotating foot • IP68 protection index • CE / OIML R60 approval.			
box connections	Stainless steel • Adjustment potentiometers • IP67 protection rating.			
wiring harness	Rubber outer coating • Stainless steel inner mesh + aluminum shield.			
mounting	recessed in ditch • Facilitates loading and unloading maneuvers using pallet trucks.			
viewers	PV1 BP120 BP101			
options	Ditch rim Shoes for fixing to the bottom of the pit			
add-ons	Weight Repeater Printer Weighing Management Software Industrial Tablet 10" Industrial Terminal 15"			
models	Dimensions L x W (cm)	No. Cells	Capacity (kg)	division (g)
	80 x 80	4x	300 / 600	100 / 200
	100 x 100	4x	600 / 1500	200 / 500
	125 x 100	4x	600 / 1500	200 / 500
	125 x 125	4x	600 / 1500	200 / 500
	150 x 125	4x	1500	500
	150 x 150	4x	1500 / 3000	500 / 1500
