Built-in Weighing Platform

description ROBUST AND PRACTICAL WEIGHING PLATFORM, FOR RECESSED MOUNTING IN A PIT, INDICATED FOR ALL TYPES OF INDUSTRIAL AND COMMERCIAL APPLICATIONS.

highlights The structure designed for maximum strength allows the equipment to support a high frequency of use

- Removable tray allows recessed mounting in pit, ideal for weighing in confined spaces
- Load cells with adjustable feet and built-in bubble level allow correct leveling of the equipment
- Complies with directive 2014/31/eu for commercial transactions.

platform Made of SR275 steel • Removable sheet metal tray • Equipped with 4 load cells • Built-in bubble level

- Surface finish in 3 steps: mechanical pickling + epoxy primer + anti-corrosion paint.

load cells Cut-type analog load cells • Capacities of 500 / 750 / 1000 / 1500 kg • THE nickel plated steel • Adjustable rotating foot • IP68 protection index • CE / OIML R60 approval.

box connections Stainless steel • Adjustment potentiometers • IP67 protection rating.

wiring harness Rubber outer coating • Stainless steel inner mesh + aluminum shield.

mounting recessed in ditch • Facilitates loading and unloading maneuvers using pallet trucks.

viewers PV1 | BP120 | BP101

options Ditch rim | Shoes for fixing to the bottom of the pit

add-ons Weight Repeater | Printer | Weighing Management Software | Industrial Tablet 10" | Industrial Terminal 15"

models	Dimensions L x W (cm)	No. Cells	Capacity (kg)	division (g)
	80 x 80	4x	300 / 600	100 / 200
	100 x 100	4x	600 / 1500	200 / 500
	125 x 100	4x	600 / 1500	200 / 500
	125 x 125	4x	600 / 1500	200 / 500
	150 x 125	4x	1500	500
	150 x 150	4x	1500 / 3000	500 / 1500
